WAIFEM/DG/BYM/2006/RMMP 03 – R/ha

April 22, 2026

The Governor
Central Bank of Nigeria
Central Business District
Garki, Abuja.

ATTENTION: THE DEPUTY GOVERNOR, ECONOMIC POLICY DIRECTORATE

Dear Hon. Governor,

**REQUEST FOR THE RELEASE OF PARTICIPANTS: MEFMI/IMF/WAIFEM REGIONAL COURSE
ON ADVANCED MONETARY AND FINANCIAL STATISTICS (BLENDED) — MAY 18-22, 2026**

I write to respectfully request the release of selected staff of the Central Bank of Nigeria to participate in the forthcoming Regional Course on Advanced Monetary and Financial Statistics (MFS), jointly organised by WAIFEM in collaboration with the IMF and MEFMI. The programme will be delivered in a blended format, with in-person sessions for Nigerian participants taking place at the CBN International Training Institute, No. 2 Lasale Street, Off Shehu Shagari Way, Maitama, Abuja from May 18 to May 22, 2026.

Introduction

Across emerging and developing economies, including those within the WAIFEM and MEFMI regions, evidence-based policymaking continues to be a central priority. Achieving this objective depends critically on the availability of consistent, accurate, and comprehensive macroeconomic data, of which monetary and financial statistics form a key component. Robust MFS compilation enables a deeper understanding of the financial sector, supports effective supervision and regulation, and strengthens the formulation and analysis of monetary policy.

Given the technical nature of MFS, compilers must possess a sound understanding of core concepts such as residency and sectorization of institutional units, classification of financial instruments, valuation principles, and related accounting frameworks. This advanced course builds on the Introductory MFS programme conducted in March 2025 and is designed to further enhance participants' expertise in line with international best practices.

Objectives of the Course

The course aims to strengthen participants' capacity in the compilation, reporting, and analytical use of monetary and financial statistics. At the end of the programme, participants will be able to:

- Explain the conceptual framework underpinning MFS compilation, including sector classification, financial instrument categorisation, valuation, and accounting principles.
- Analyse the role of Other Financial Corporations (OFCs) within the financial system and their implications for monetary data collection.
- Prepare high-level and detailed analytical presentations of monetary data, including Depository Corporations Survey (DCS) and Financial Corporations Survey (FCS), using IMF standardised reporting formats.
- Understand the integration of MFS within the IMF's broader macroeconomic framework, including the Balance Sheet Approach (BSA).
- And appreciate emerging issues such as the impact of financial technology (FinTech) and climate change on financial sector statistics.

Course Content

The programme will cover a range of topics, including:

- The scope, uses, and sources of MFS, as well as the compilation process.
- Core building blocks such as residency, economic territory, institutional sectors, and classification of financial assets and liabilities.
- Accounting rules, including timing of recording and valuation methods.
- Measurement and compilation of monetary aggregates from sectoral balance sheets.
- And structure and linkages between central bank, other depository corporations, and other financial corporations' balance sheets, and their role in producing analytical surveys.

Delivery Modality

The course will combine lectures and practical exercises, facilitated by experts and consultants from the International Monetary Fund, with a strong focus on hands-on application.

Target Participants

This course is intended for central bank officials and staff of regulatory agencies responsible for compiling monetary and financial statistics. Participants are expected to have a background in economics, statistics, or equivalent professional experience. Completion of the Introductory MFS course – either in person or via the MFSx online platform – is strongly recommended.

As this is a modular programme, we kindly encourage the participation of staff who attended the Introductory MFS course in March 2025.

Request for Release of Participants

In this regard, WAIFEM respectfully requests the release of the following staff of the Central Bank of Nigeria who previously participated in the Introductory MFS course:

1. NwachukwuUdochukwu
2. Onwuka Etunim
3. Salisu Nafisa
4. Shaba Ibukun
5. Akpan Usenobong
6. Tochukwu Nwanja
7. Shekarri Linda
8. Olaoye Oyebanji Joel
9. Ajayi Oluwafemi
10. Umeokwobi Richard
11. Bello Dalhatu
12. Okeke Esther

Administrative and Financial Arrangements

IMF and WAIFEM will provide tuition, course materials, and meals (lunch and refreshments) during the training period. The nominating institution will be responsible for participants' incidental expenses.

Confirmation of Participation

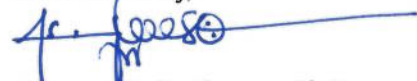

We kindly request the nominated participants to confirm their attendance on or before May 11, 2026, via email at: macroeconomics@waifem-cbp.org.

We are confident that this programme will further equip your staff with the technical expertise required to compile high-quality monetary and financial statistics, thereby supporting sound economic management in Nigeria.

We deeply appreciate your continued support and cooperation and look forward to welcoming your nominees to this important regional initiative.

Please accept, Honourable Governor, the assurances of our highest esteem.

Yours sincerely,

Christian R. K. Ahortor, Ph.D.

Director, Research and Macroeconomic Management Department

For Director General
